

LiPo Battery Regulations at Stafford Outdoor and Hednesford Indoor Raceways

- All LiPo batteries **MUST** only be charged/discharged using a designated LiPo battery charger.
- All Lipo batteries **MUST** be Charged/Discharged in a commercial Lipo Sack/Container.
- Charge/Discharge rates must be as per manufactures instructions only.
- Only hard case LiPo batteries are allowed.
- Batteries must be either 7.4v or 7.6v LiPo, and be on the BRCA Approved listings LiPo cells
- Batteries must only be charged to a maximum of 8.40v.
- Your charger **MUST** not (at any point in time, whether a battery is connected/charging or not) be set with a cut off voltage higher than 4.20v per cell. Anyone found with a charger setting higher than this will be deemed to be deliberately over-charging their battery, which will not be tolerated on safety grounds. Any driver found with a charger set higher than 4.20v per cell may be excluded from the event.
